

IBRID SOLUTIONS IP & ANALOGIC

- **TCPIP Connection** (CAT5 cable)
- **RS485 LINE** (Shielded, cable with 2 connectors for power supply and 2 connectors RS484 for signal)
- **VIDEO ANALOGICAL SIGNAL** (Coaxial cable RG59)
- **HDMI** (Cable HDMI)
- **TWISTED TELEPHONE CABLE** (Cable with 2 twisted connectors for signal)
- - - **UMTS/GPRS** (3G connection)
- (x)** = Maximum Number of connected device. The devices can be added together ex: (x) + (x)
- [x]** = Maximum Number of connected device. The device cannot be added together ex: (x) or (x)

CCTV System

Elaborazione intelligente dell' immagine digitale

By using neural advanced digital elaboration immagine algorithms our company has implemented advanced functions such as:

- **Slow motion:** object permanency recognizing inside the camera take or opposite events like the vandalism phenomenon reconizing people counting.
- **Motion - tracking object:** extreme precision movement alarm recognizing independently from atmospheric events and filtered by different factors such as size, direction origin, route, passage crossing and/or perimeter.
- **Number plate reading**

Character recognizing for number plate reading or alphanumeric codes for elaborations such as passages management, parking spaces or LTZ

Hybrid solutions

Implementation of an integration on digital systems models Phantom and Videospay for the management of PAL/NTSC video cameras and IP products such as IP cameras and video servers. Integrated management of programming functions such as event research, visualizing, recording and remote transmitting for the realization of hybrid systems with traditional and flexibility solutions.
